Game Select (double click or press Load Game)

Tournaments Table

Select desired tournament by clicking on the tournament from the tournaments table. Then double click on the desired game, or select and click Load Game.

Gemini Initial Screen

The screenshot displays the Gemini software interface for an ice hockey game. At the top, there is a 'HYDRA' logo and a 'Game Setup' table. The table includes columns for Date, Game #, Home, Guest, Time, Location, Group, Phase, and Info. The game is identified as '25.05.2014 Sun', Game # 64, Home: Russia, Guest: Finland, Time: 21:00, Location: Minsk Arena, Group: Gold Medal Game, and Phase: Gold Medal Game.

Below the table, there are controls for 'Rink now showing shots for Period: 3' and 'Change Viewpoint'. A 'Change View Button' is located near the 'Change Viewpoint' control. The rink itself is shown with various annotations, including player numbers (e.g., 72, 35) and plus/minus values (e.g., +21, -27). A 'GK in Goal' label points to the goal area. A 'Game Chat' window is visible on the right side, showing a list of game events with timestamps and player names.

Annotations and callouts include:

- Use cursor keys up/down to see diff periods.** (pointing to the period selection controls)
- Change Team (for shots)** (pointing to the team selection buttons)
- GK in Goal** (pointing to the goal area)
- Game Chat** (pointing to the chat window)
- Face Off Buttons** (pointing to the 'FACEOFF' labels on the rink)

From this initial screen Gemini is able to log shots, goals, face offs, assists, and plus/minus.

Change View Point

The 'Change Direction' dialog box is shown, containing three buttons:

- Swap Team
- Swap Rink
- Both Teams

By clicking on the Change Viewpoint button the layer as listed above will appear.

Swap Team: will swap the teams benches on the ice (consider the team names to be where the player benches are). This determines the direction of play.

Game Setup									
Date	Game #	Home	Guest	Time	Location	Group	Phase	Info	
25.05.2014 Sun	64	Russia	Finland	21:00	Minsk Arena		Gold Medal Game		

Rink now showing shots for Period : 3 | Change Viewpoint

0 :G
11 :SSG
3 :SPG
0 :SSP

Finland 2 5 Russia

G: 2
SSG: 7
SPG: 3
SSP: 0

Swap Rink: normally it is expected that Gemini placement will be on the other side of the player benches (the same side as the officials box). However if the Gemini machines happen to be placed on the same side as the player benches, then by clicking on Swap Rink, it will change the viewpoint of the rink by moving the player benches to the bottom of the screen.

Game Setup									
Date	Game #	Home	Guest	Time	Location	Group	Phase	Info	
25.05.2014 Sun	64	Russia	Finland	21:00	Minsk Arena		Gold Medal Game		

Rink now showing shots for Period : 3 | Change Viewpoint

2 :G
7 :SSG
3 :SPG
0 :SSP

Russia 5 2 Finland

G: 0
SSG: 11
SPG: 3
SSP: 0

Both Teams: this is used to log shots for both teams. Divided by the red line, shots made on either side of the red line will count for the team playing in that offensive zone. Shots made from behind the red line must be made on the offensive side, then dragged over to the desired location.

22	23	24	25
GK			

FACEOFF

- Click on the rink where the shot was made
- Select the type of shot
 - SSG (Shot Saved by Goalkeeper): the main type of shot that is collected, a shot made on the net that was stopped by the goalkeeper. Keep in mind that if the GK had not stopped the puck would it have gone into the net? If the GK stops the puck but would have missed the puck then it is considered as a miss and not an SSG. (log as an SPG if applicable)

- SPG (Shot Past Goal): (WS tournament only) the shot where player had the intent to shoot on net but missed (therefore not a puck clearing, or a missed pass). This includes the puck hitting the post or crossbar.
- SSP (Shot Saved by Player): (WS tournament only) the shot where a player had the intent to shoot on net but was blocked, or deflected by an opponent player, and would have gone into the net if not blocked.
- G (Goal): a shot made determined to be a goal.
- Click on the jersey number of the player who made the shot.
- Upon selecting the jersey number for SPG, and SSP the layer will close.
- For SSG, check the GK who stopped the shot but it should be according to the GK changes table. Click on OK to save.

28	34	38	40	42	47	58	61	71	81

GK

Russia GKs

35 | 72 | EN | PL

Cancel | DEL | OK

- Be sure that the GK who was scored on is correct. Select the jersey number, or EN (for Empty Net). Then click OK to save.

This is the sequence to log a goal.

1. Click on location on ice rink where shot was made.
2. Click on "G" for goal.
3. Click on jersey number for player who made the goal.
4. Click inside the net for the approximate area where the puck crossed the line into the net.
5. Verify the GK who was scored on (should not have to modify, the GK records table will always display the most current GK).
6. Click OK to save the shot.

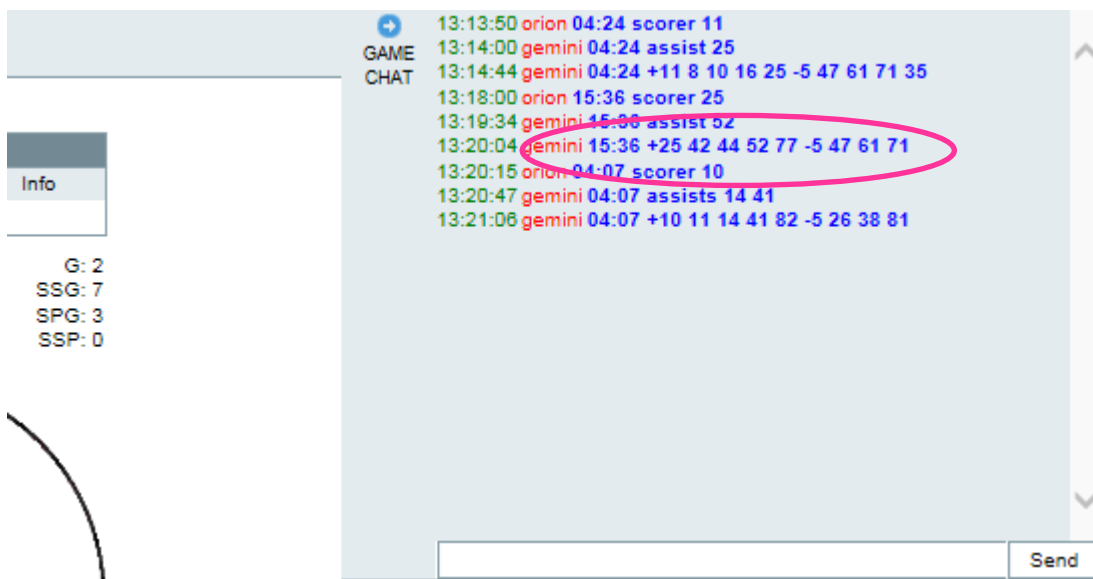

Hydra Chat Usage

Hydra Chat is a simple communication tool for the Stats team to be able to follow the communication protocol between each other if Wired or Radio Communication is not available.

It also can be used to transport Plus-Minus information from Gemini Light (usage of this module is based on the tournament setup – mostly used in lower divisions) to Orion in case when Plus-Minus spotters are located in the Stats bench together with Gemini Light operator.

In this case the Plus Minus information has to be sent through Hydra Chat in the form of the following sample message "some text +12 23 34 12 52 -18 1 24 12".

The numbers following the plus sign should be separated by space and will be treated as jersey numbers of the players of the team that scored. Same – numbers following the minus sign will be used as jersey numbers of the players of the team that allowed a goal.

Entering Face Offs

The screenshot shows a 'FACE - OFF' window with a table of results for Period 3 and a grid for entering player jersey numbers.

GK					GK				

Buttons: Cancel, List

- Click on the Face Off button. The three buttons are to divide the zone in which the face off has taken place. The three zones are
 - DZ (Defense Zone): from the blue line to the defending team's net. This is the Attack Zone for the opposing team.
 - MZ (Middle Zone): between the two blue lines (center ice).
 - AZ (Attack Zone): Offensive zone from the blue line to the net that the team is trying to score on is located. The Defense Zone for the opposing team.
- Click on the two jersey numbers from each team who are facing off. Double click on the player who wins the face off.
 - A Face off won is regarded as the player who created an advantage for their team and took control from the face off. Thus by defined by whether the player managed to pass the puck to a player on their own team, or pushed the puck forward gaining control.
- The screen will flash and show the registered face off in the table, then close after 2 seconds.
- Keep in mind that the sequence of the face offs is not important, just the jersey numbers, and F/O winners.
