

Data Quality Check

2018 Championship Season

Reports approval

Before Approving a Report, the Results Manager should ensure data does not contain any big/evident error - it is one of their primary duties.

This document lists some of the simple data quality checks that can be performed on some of the reports to avoid - and be able to override - big setup or data entry errors.

This list is based on experienced and "common" errors and does not aim to be fully comprehensive but only a suggestion.

The Results Manager will add their own experience to identify errors.
